

'developing markets skyhigh'

Wireless Development roadmap

Cognitive Radio platform Nederland

Koen Mioulet, Marketing4B2B

Overview

- **Introductie**
- De Wireless Roadmap
 - Hybride systemen
 - Cognitive Radio
 - Reconfigurable (SDR)
- Toepassingen Hybrid/Cognitive Radio
- Ontwikkelingen industrie

'developing markets skyhigh'

Marketing4B2B:

Business Development for B to B markets

Portfolio-, market-, funnel development

Hands-on marketing & sales execution

'developing markets skyhigh'

marketing4B2B

Marketing4B2B highlight: Wireless Roadmap developments

- Seminar 'frequenties in beweging' met o.a. EZ (juni '07)
- Seminar 'Wireless roadmap voor OOV' met o.a. TNO, WMC (okt '09)
- Artikelen Wireless in Verbinding, TM, FMT, Uneto - hand out
- Oprichting CR platform jan'10 (+ TUD, EZ)

Trend naar hybride radionetten en software defined ra:

'Wireless roadmap'
voor openbare orde
en veiligheid

CRplatformNL; scope

De partijen

- Technologie ontwikkelaars
- System integrators, vendors, operators
- Beleid en *regulatory*

Toepasbaarheid:

- Concrete *use cases* ter tafel
 - TV white space
 - Events & venues
 - Traffic Telematics
 - (air)ports & harbours

'developing markets skyhigh'

Opbouw van de middag

Koning en Hartman

WMC, Nomad

Overview

- Introductie
- De Wireless Roadmap
 - Hybride systemen
 - Cognitive Radio
 - Reconfigurable (SDR)
- Toepassingen Cognitive Radio
- CRplatform

The Wireless Roadmap....

'developing markets skyhigh'

Technology roadmap estimation

Source: EU project 'SPORTVIEWS', 2007

Spectrum Policies and Radio Technologies Viable In Emerging Wireless Societies

'developing markets skyhigh'

Technology roadmap clustered

Multiple paths

More bit/Hz

Bron: 'SPORTVIEWS', TNO, WMC, Wiki

Hybride radio:

Combineer afstand en capaciteit; trade-off blijft

'developing markets skyhigh'

Hybride (1) : de meeste mobieltjes !

'developing markets skyhigh'

Hybrid radio solutions (2); combining multiple bearers of same protocol

Wireless Multiplexing Terminal

Made in Holland !

Source: Triple IT

'developing markets skyhigh'

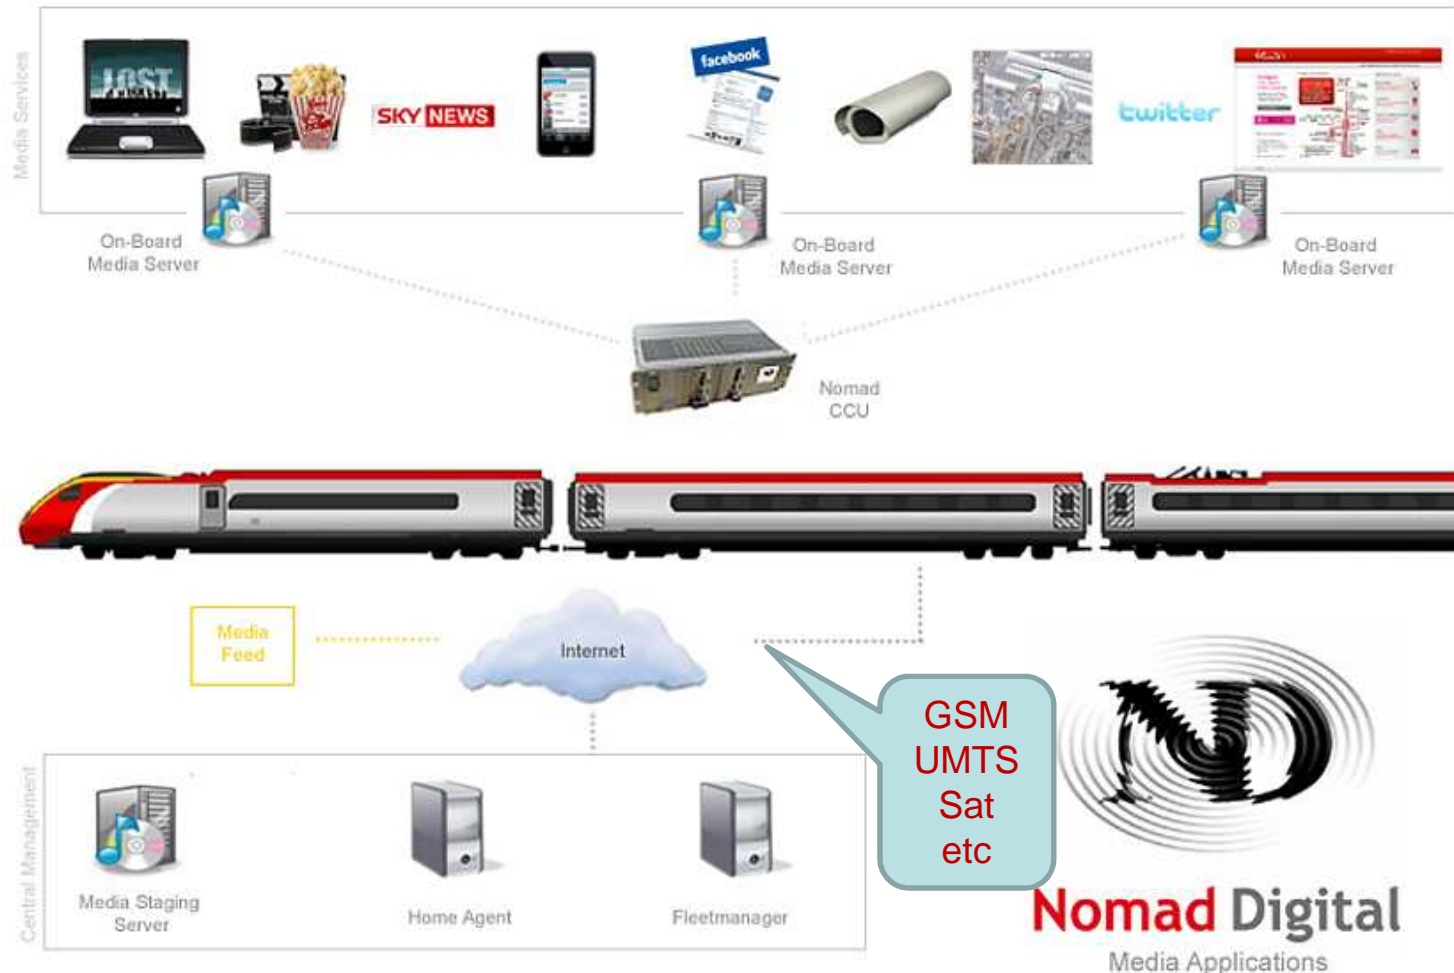

Hybride (3): Robuust door meerdere paden; voorbeeld 'FiGo' hybrid radio voor OOV

'developing markets skyhigh'

Hybrid (4): Nomad on vehicle hybrid systems

Cognitive of reconfigurable radio; Mitola

- A Cognitive Radio is an adaptive, multi dimensionally aware autonomous radio system that learns from its experience to reason, plan and decide future actions to meet user needs (SDR forum)
- A cognitive radio is a smart radio

'developing markets skyhigh'

Levels of cognitive radio (1), *white space use*

National mobile network, eg UMTS

Band selective

Spectrum selective

Cognitive radio device scans for spectrum availability

National wireless broadband, eg Wimax

Local wireless broadband, eg WiFi

9 dec '10

CRpNL; wireless roadmap

Bron:
WMC, Wiki

17

'developing markets skyhigh'

Levels of cognitive radio (2): user requirements

National mobile network, eg UMTS

Smart radio device matches QoS requirements with network(s) available

National wireless broadband, eg Wimax

Local wireless broadband, eg WiFi

Traffic requirement

'developing markets skyhigh'

Cognitive radio in gradaties

DECT = mid '90 s !

DECT kent al *dynamic channel allocation*

Dat is een gradatie van cognitive !

'developing markets skyhigh'

Reconfigurable or Software Defined Radio als concept zeer voorstelbaar

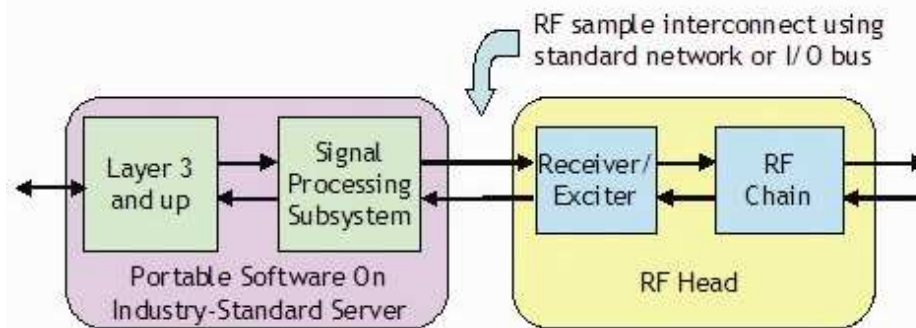

Convenient bij Hybrid & Cognitive Radio: de “software defined” radio

N X Traditional architecture for a line card in a BTS

N X Software Radio architecture for a BTS **1 X**

- In plaats van meerdere fysieke radio boards
- Gebruikt generieke radio hardware
- Met software die bepaalt welk spectrum, protocol, modulatie, etc
- DE facilitator of *enabler* van hybride en cognitive ontwikkeling

'developing markets skyhigh'

SDR, de eerste stapjes

Barcelona (MWC):

Mimo-On GmbH: SDR baseband

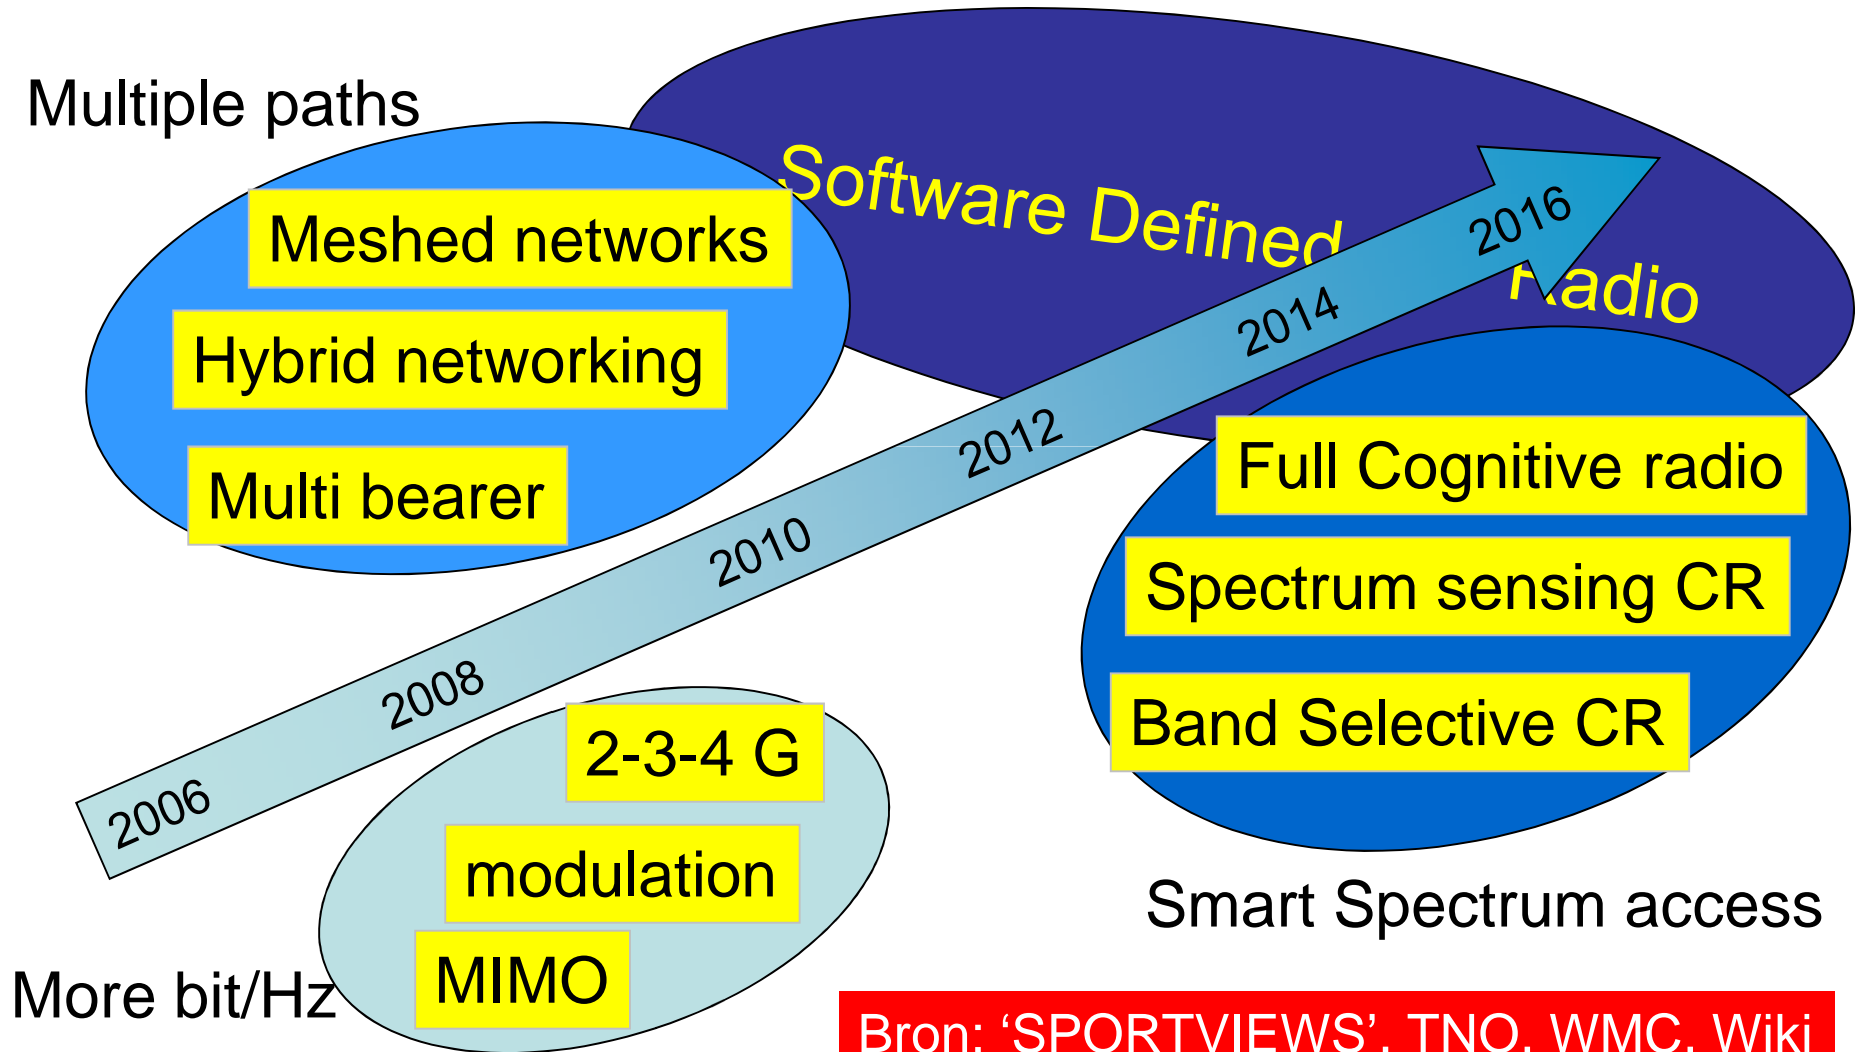

IMEC reconfigurable receiver chipset

'developing markets skyhigh'

Technology roadmap clustered

Multiple paths

Overview

- Introductie
- De Wireless Roadmap
 - Hybride systemen
 - Cognitive Radio
 - Reconfigurable (SDR)
- Toepassingen Hybrid/Cognitive Radio
- Ontwikkelingen industrie

Toepassingsgebieden nieuwe radio techniek (1)

Komen best tot hun recht in omgeving met:

- Ad hoc, dynamische setting
 - *Self configuring* networks
 - *Opportunistisch* gebruik ether
 - Ongeplande netwerkdeelnemers, 'anarchistisch'
- QoS gevoelige of *mission critical* datastromen
 - Robuuste netwerken; QoS behoeftes
- Vele en verschillende devices en standaarden
 - Self scanning (cognitive) elementen

Toepassingsgebieden nieuwe radio techniek (2)

- OOV, defensie

*Hans Borgonjen
in laatste CRpNL !*

- Public wireless

- Verkeer en Vervoer

*Paul Potter
in eerste CRpNL !*

- Domotica

Toepassingsgebied: (public) Wireless networks

- Netwerk tbv meerdere protocollen
=> SW defined
- Zelf configurerend, zonder management
=> mesh
- Voor *devices* die zelf een netwerk opzoeken
=> cognitive

Bron: Ericsson

'developing markets skyhigh'

Toepassingsgebied Verkeer & Vervoer; Intelligent Transport Systems, verkeersmanagement

Vehicle to vehicle
communication;
'swarming'

Smarter roadsides

- ⇒ Efficiëntere verkeerstromen,
- ⇒ Congestie
- ⇒ Veiligheid, Milieu

'developing markets skyhigh'

Toepassingsgebied: domotica en home automation

Self configuring: mesh

Propagatie niet managed:
Multi bearer, hybride

Short range, low power

Anarchie deelnemers:
cognitive radio's
